Subject: RE: problem with search request for SN 10/059,447

Dear Mary,

Please RUSH search the attached previous search request with the following modifications:

Do not search SEQ ID NO:1 and 12. Search the SEQ ID NO:2-11 in the database requested.

Thanks,

Mike Pak

Hello Mike,

I would like you to review my request and advise me and STIC regarding the same. My search request is for a total of twelve SEQ IDs, ten of which are peptides which range from 6 amino acids in length to 29 amino acids in length, one is a single full length polypeptide of 629 amino acids and one if a polynucleotide comprising 1890 nucleotides. I know that the total number of sequences is more than 10 but I do not think that searching the above sequences would exceed the time limit for the STIC computer. You can access the file on IFW if you would like to check the above sequences yourself. Please advise.

Thanks

-Manjunath

If you have any questions please call me at 415-435-1111

Thanks
